

ABSTRACT OF THE DISCLOSURE

One or more embodiments of the invention provide a method, apparatus, and article of manufacture for annotating a sequence of images. A frame comprises one or more images. A sequence of such frames to be consecutively displayed on a display device is obtained. Annotation information that includes an identification of a frame, an  
5 annotation, and a location on the identified frame to display the annotation is obtained. One or more of the sequence of frames are displayed until the identified frame is displayed. When the identified frame is displayed, the display sequence is paused and the annotation is displayed at the specified location.
